With Candy Crush Saga MOD APK (Unlimited Lives), you will be comfortable to solve every level in the game. From simple levels to the hardest levels, you always have a second chance! Introducing Candy Crush Saga – The most successful puzzle game of all time If I ask 100 people which is the best and most popular match-3 puzzle game, I will definitely get 101 answers that it is Candy Crush Saga. The game of King is considered to be the best mobile game with billions of downloads on Google Play and the App Store. The game was first released on Facebook on April 12, 2012, followed by versions for Android, iOS, and Windows. Possessing simple gameplay, the game is very well done with many challenges and useful things. Although it is a puzzle game, you will not find a headache but on the contrary, you feel like you are lost in a sweet world with hundreds of colorful sweet candies. Candy Crush Friends Saga is a similar game you can try. Match three candies to get points That right. Candy Crush Saga's gameplay is like Bejeweled, which means match-3 but is in an unlimited time version. If in Bejeweled, you have to complete the level in the time that the game requires, this adds to the challenge but accidentally makes the player feel more pressure, otherwise, that is completely improved in CCS. The game gives you something a bit slower and more fun. You can think an hour, a day or a week. Playing 5 turns, feeling stuck and lacking in ideas, you can go and have a cup of coffee and come back to finish the game. That doesn't matter. At the core of this game is that you need to swap the positions of two candies next to each other in vertical or horizontal lines by swiping your finger. If it creates a row or a column with at least three candies, they will disappear and random candies on top will fall to fill the gap. Also, when you match 4 candies of the same type, you will create special candies corresponding to the color of the candy. Candies that are made up of 5 or more tablets can clear a lot of candy in the box. At difficult levels, the game has some special requirements like breaking the frozen candy, eating 20 green candies, unlocking the hidden candies at the end of the table, clearing all the chocolate, ... Depending on the level, the challenges will increase. You can overcome dozens of first levels simply like a walk. But don't think that the game lacks the challenge. No one dares to claim that this game is easy. Many people remember the moment they graduated from high school, but for me, it was the moment I passed level 96 of the game. I was stuck there for weeks but somehow, I got through after 1269th time of playing. What's interesting about Candy Crush Saga is that even though there are some levels that are difficult, it doesn't make players feel depressed. I always had the feeling that I could win the game any time and thought I was just missing a bit of luck. Discover the world of sweet candies When playing Candy Crush Saga, you discover the world of sweet candy designed in an extremely eye-catching and colorful way. The design of the game makes me feel excited and addictive. In particular, when you "eat candy", everything will explode or there is a lightning bolt to dissolve them. I can play games all day, anywhere, anytime. At breakfast, sit down for a coffee, relax on the sofa or even I can bring my phone to the toilet to play this game. The game is an effective solution when you have a long journey on a bus or a taxi. Many game modes ClassicTarget ScoreClear the Jelly Collect the Ingredients Order Mode Invite friends to play together You can invite your friends to join the game by sharing games via social networks. This has the main purpose of advertising for the game, but you also get some offers such as more life to play.
